Jewellery Making Classes

A jewellery making and designing course suitable for all levels. Learn fundamental skills such as sawing, filing, soldering, polishing and setting of precious gemstones.

Make a ring, bracelet, pendant or earrings and if time permits another project of your own designs.

There are three suggested projects with a reasonable amount of freedom within the parameters of each exercise for you to come up with an original design. Materials are not included.

Learning Objectives

On completion of this course you would have:

- A solid understanding of the occupational health and safety aspects of a metal workshop, specific to jewellery making skills.
- Learnt how to design a number of different basic jewellery pieces and incorporate decorative aspects such as saw piercing, hammering, and gemstone setting into your designs.
- Learnt how to incorporate findings such as brooch backs, earring hooks/backs and cufflinks into your design.
- Designed and constructed at least three pieces of jewellery.

Courses

Course duration: 10 hours

Materials required

- Pen and paper

Please contact us to confirm pricing and availability of the course.

The tutor has a basic tool kit available for purchase.

Please note projects that are outside the parameter of the project that is set, will incur an extra cost.

For safety reasons it is important to ensure you wear closed in shoes and long hair is tied back at all times.
